

Granton Sportsfield – file note 27.03.24

Quotes discussed at last meeting

Carlton contracting – met on site. Providing updated quote. Original was supplied to W.Watson in Oct.

Ian Watt Farm services (recommended by Michael Mann). Initial rough estimate provided Oct 23, since retired. Rob Burtonshaw now in charge. Contacted 25.03.24. He was unable to meet on site before going on leave on Good Friday.

Therefore, only one quote will be available for consideration on 8th April.

Both companies have suggested they would use similar methods to deal with the problem

Neither is able to give any sort of guarantee as the outcome is very weather dependant.

Points to consider

Once the work has been done it will take some time to settle and for the new grass seed to germinate and establish. This will be very much dependent on the weather but is likely to be between 4 – 8 weeks, during which time the field will be out of use.

St Lawrence will need to decide if they want the work done in the current academic year.

If the work is done over the school summer holidays, then the facility is likely to be out of action for community use during a large part of that time.

Doing the work later in the year would give the opportunity to get a more detailed quote from Rob Burtonshaw/ANO.
